

Business Analytics

Jobs

We're seeking

- **highly motivated self-starters with solid analytics backgrounds (e.g. mathematics, computer science, natural science, & engineering)**
- **team players who thrive in a small company with a challenging, fast-moving environment**
- **solution-oriented, real world, "down & dirty" problem solvers**

BIG PRO: You have the ability to explain complex matter to non-science people

POSITIONS AVAILABLE

Business Analytics Consultant

- main focus is on client analytics projects
- diverse areas that include: data mining on agriculture trial data, analyzing and optimizing online marketing campaigns, optimizing bidding systems, dynamic pricing consultancy, & social marketing data mining
- projects chiefly consists of data analysis, mathematical modeling, and prototype development

Big Data/ Statistics Specialist

- primarily an internal position, but as we are a small company you would also work directly on client projects
- main goal is to apply and adjust traditional OR methods to big data./cloud computing environment
- potential to become our internal big data expert
- knowledge of Map-Reduce, Hadoop, NoSQL DBs, etc.

To apply, send your CV to info@haensel-ams.com

To all applicants: Our openings are for full-time positions, but part-time work at 60-80% is also possible. Clients at AMS are 80% international, so a good command of English is an advantage. The main working location is Berlin, but there is potential for projects in other parts of Europe. We expect you to have a good foundation and basic understanding of statistics, time series analysis, optimization, operations research, and data analytics. You should also have some knowledge of data mining and machine learning, and be familiar with tools like: java, R, Python, and/or Matlab. Experience with PHP and web development is a plus.
